*"Everyone I had known had disowned me. Left me for a child predator bait in the wilderness. It seemed that my life up until this point had been nothing but an unfortunate series of blackouts and acid flashbacks. Now that I actually wish to rehabilitate myself, no one's left to assist me. I was all alone....."*

*“It’s powerful because -- I mean, you could sit down with your friend and tell him a story and they could be like off somewhere else in their mind, but if you are telling the story through a film, they are watching, they are seeing, they are hearing, they are making all these different connections through using more of their senses instead of just listening. They are seeing it firsthand pretty well.” (Leo)*
